SYNTHETIC RISK & REWARD INDICATOR (SRRI)

High - 6 out of 7

The historical data used for calculating the synthetic indicator are not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. This share class has been placed in the aforementioned risk class because its unit price is subject to significant fluctuation, therefore the profit potential and loss exposure may be high.
